## *Turkish Hamam Bath Therapy*

### **Introduction**

Hamams are bathhouses found in Turkey and Morocco. They have been a cultural staple of centuries in those countries and are now a popular on stop solution to clean off, detox and relax all that tiredness.

**90 Min.**

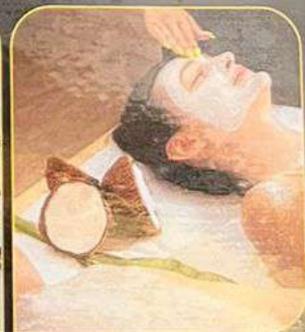

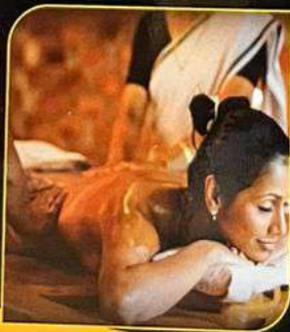

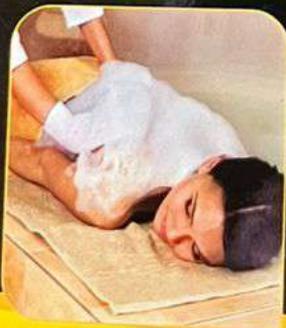

**2 Therapist**

### **History of Hamam**

Hamams are modeled after ancient Roman bath, with demand ceilings, regal columns and a marble interior. The bathing facilities have been around for centuries and Istanbul has several operating hamams that date back to the 1500s and 1700s. Hamams are often called "Tarkish baths" due to their popularity during the Ottoman Empire.

### **The Process**

It begins with a 4-hand synchronized body Therapy which is carried out by 2 therapists which is choreographed to give you a balanced relaxation with left-right combination. Then after followed by body scrub from head to toe for detoxification, body cleansing and dead skin removal. Further followed by a Moroccan style of bubble bath which includes manicure, pedicure and hair wash sessions to provide you with intense body cleansing that eventually leads to a refreshing, relaxing and rejuvenation experience.
